

SUMMARY OF EXAMINER INTERVIEW

Applicant would like to thank the Examiner and his Supervising Examiner for granting a telephonic interview on March 20, 2007. No exhibits were shown or demonstrations took place. Claims 1, 15, and 21 were discussed, as were the references Boehm et al. (US 6,457,170) and Obilisetty (US 2004/0268344).

Applicant asserted that Boehm does not disclose building a version of a software application by selecting files on a first computing device and building the application on a second computing device as originally claimed in the third element of claim 1. It also was asserted that Boehm does not provide for selection of a version of the application and Applicant agreed that an amendment would be entered to more particularly recite this feature. Applicant asserted that Obilisetty does not disclose a file system that facilitates the building of a software application on two computing devices, but that an amendment would be entered to more particularly recite this feature. The Examiners agreed that such an amendment reciting use of the files leading to a useful process would direct the claims to statutory subject matter.
